To Whom it may concern,

Ref. R-WALL Ltd

Having reviewed the certification on your website and associated documentation for ICF (Insulated Concrete Formwork) system, R-WALL, we feel that this would be suitable for the provision of our warranty.

We have assessed the BBA accreditation, and this does appear suitable for certain uses, it does not have any accreditation with regards to finishes internally or externally so the acceptance would be based on the system components listed and as per their described and acceptable use and installed correctly by suitably trained and qualified persons.

We would note the limitations within the certificate as well as the requirements of installation must be adhered to, and the acceptance would be as a product of ICF and concrete fill using XPS and the plastic tie system.

Projects would be assessed in the normal manner and our inspections would still determine final acceptance and issuing of any certification.

We trust this is acceptable and look forward to working with you.

Kind regards

Kind regards

Andrew Dyson Cert CII
